***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

Species I; Fig 2-3

Species II; Fig 9

Species III; Fig 10, 13-14

Species IV; Fig 15

Species V; Fig 16

Species VI; Fig 17

Species VII; Fig 18

Species VIII; Fig 19

Species IX; Fig 20

Species X; Fig 21

The species are independent or distinct because Species I describes a shunt conductor with dielectric connected to outer conductor. Species II utilizes a helical shunt. Species III contains a gas discharge tube as a voltage protective device. Species IV is an L-shaped embodiment. Species V is a T-shaped embodiment. Species VI is a wideband configuration with a sleeve. Species VII is a narrow band configuration without a sleeve. Species VIII is a reverse polarity configuration. Species IX is a male-male connector configuration. Species X is a female-female connector configuration.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Art Unit: 2800

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
